

I want it known that I like my privacy at home as much as the next person. But I do not want anyone changing our state law concerning our telephone laws against telemarketers calling all hours of the day or at night. If I want to do business with any of the banks who are trying to change the law then it is for me to decide and not them. If they want to challenge our laws then they should go through our state courts and keep the federal laws out of it. As a taxpayer of Indiana I want it left alone!
